Subject: pilot study at BWD Well 6-2

Mike – can you report any progress is reaching an agreement with the Navy for the pilot study on BWD Well 6-2 ? We received a draft workplan from them last week in order to be ready to start the pilot as soon as agreement is reached. As you know this is likely to be a key part of the remediation of the hot spot that is just upgradient of plant 6 and the pilot test is needed to demonstrate how effective it might be. I thought that conceptual agreement had been reached early this summer but the details needed to be worked out. Please let me know what the status is. Thanks Jim H
